Subject: Climax Mine - memos

Hi all,

I hope these are the memos you were referring to...

Ambris memo - chemical nexus of an ephemeral stream to a lake a few miles away (R9)  
[http://www.usace.army.mil/Portals/2/docs/civilworks/regulatory/cwa\\_guide/Kennedy\\_N-RPW\\_SPL-2007-261.pdf](http://www.usace.army.mil/Portals/2/docs/civilworks/regulatory/cwa_guide/Kennedy_N-RPW_SPL-2007-261.pdf)

A memo describing that less than 3 months can be considered as seasonally (R10)  
[http://www.usace.army.mil/Portals/2/docs/civilworks/regulatory/cwa\\_guide/NWP-2007-945.pdf](http://www.usace.army.mil/Portals/2/docs/civilworks/regulatory/cwa_guide/NWP-2007-945.pdf)

The memo you mentioned stating that a TS does not sever the jurisdiction of upstream waters is the "Fort Knox" memo  
[http://www.usace.army.mil/Portals/2/docs/civilworks/regulatory/cwa\\_guide/WTS\\_POA-1992-574\\_POA-1992-574-Z.pdf](http://www.usace.army.mil/Portals/2/docs/civilworks/regulatory/cwa_guide/WTS_POA-1992-574_POA-1992-574-Z.pdf)

These can all be found at the link below under "Other Supporting Documents"  
<http://www.usace.army.mil/Missions/CivilWorks/RegulatoryProgramandPermits/RelatedResources/CWAGuidance.aspx>

Also – I'm still looking for something we might have said in the past RE wetlands whose sole role in a potential TS is dilution – will let you know if I find anything...

Hadas
